

# How to Stay Up-to-date with SAP BTP Trials and Services

por Mayko Silva

# Finding Free Tier Services in SAP Discovery Center

So, how do we keep track of all this? Well, SAP has made it pretty easy for us. Let me show you a neat trick.

**1**

## **SAP Discovery Center**

Open your web browser and go to the SAP Discovery Center. It's like the information hub for all things SAP BTP.

**2**

## **Services Section**

Look for a section called "Services". It's usually pretty easy to spot.

**3**

## **Categories Menu**

In the left-hand menu, click on "Categories" and then look for "Always Free & Free Tier Services".

**4**

## **Up-to-date Info**

This page will show you all the current free services and their limitations. It's always up-to-date, so you don't have to worry about outdated info.

# Finding Trials for Other SAP Products

Now, you might be thinking, "That's great, but what if I want to try other SAP products?" Well, I've got you covered there too!

1

## SAP Website

Go to [sap.com](https://www.sap.com). It's like the front door to all things SAP.

2

## Trials and Demos

Look for a link that says something like "Trials and Demos" or "Try and Download". Click on that.

3

## Choose Your Product

Next, you'll want to find an option like "Choose your product".

4

## Explore Options

Once you click that, you'll see different options like Basic Trials, Advanced Trials, and Free Tier.

# Pro Tip: Adapt to Website Changes

Websites change, right? SAP is always updating their site to make it better. So, the exact words or where you find these links might be a little different when you look. The important thing is to understand the logic.

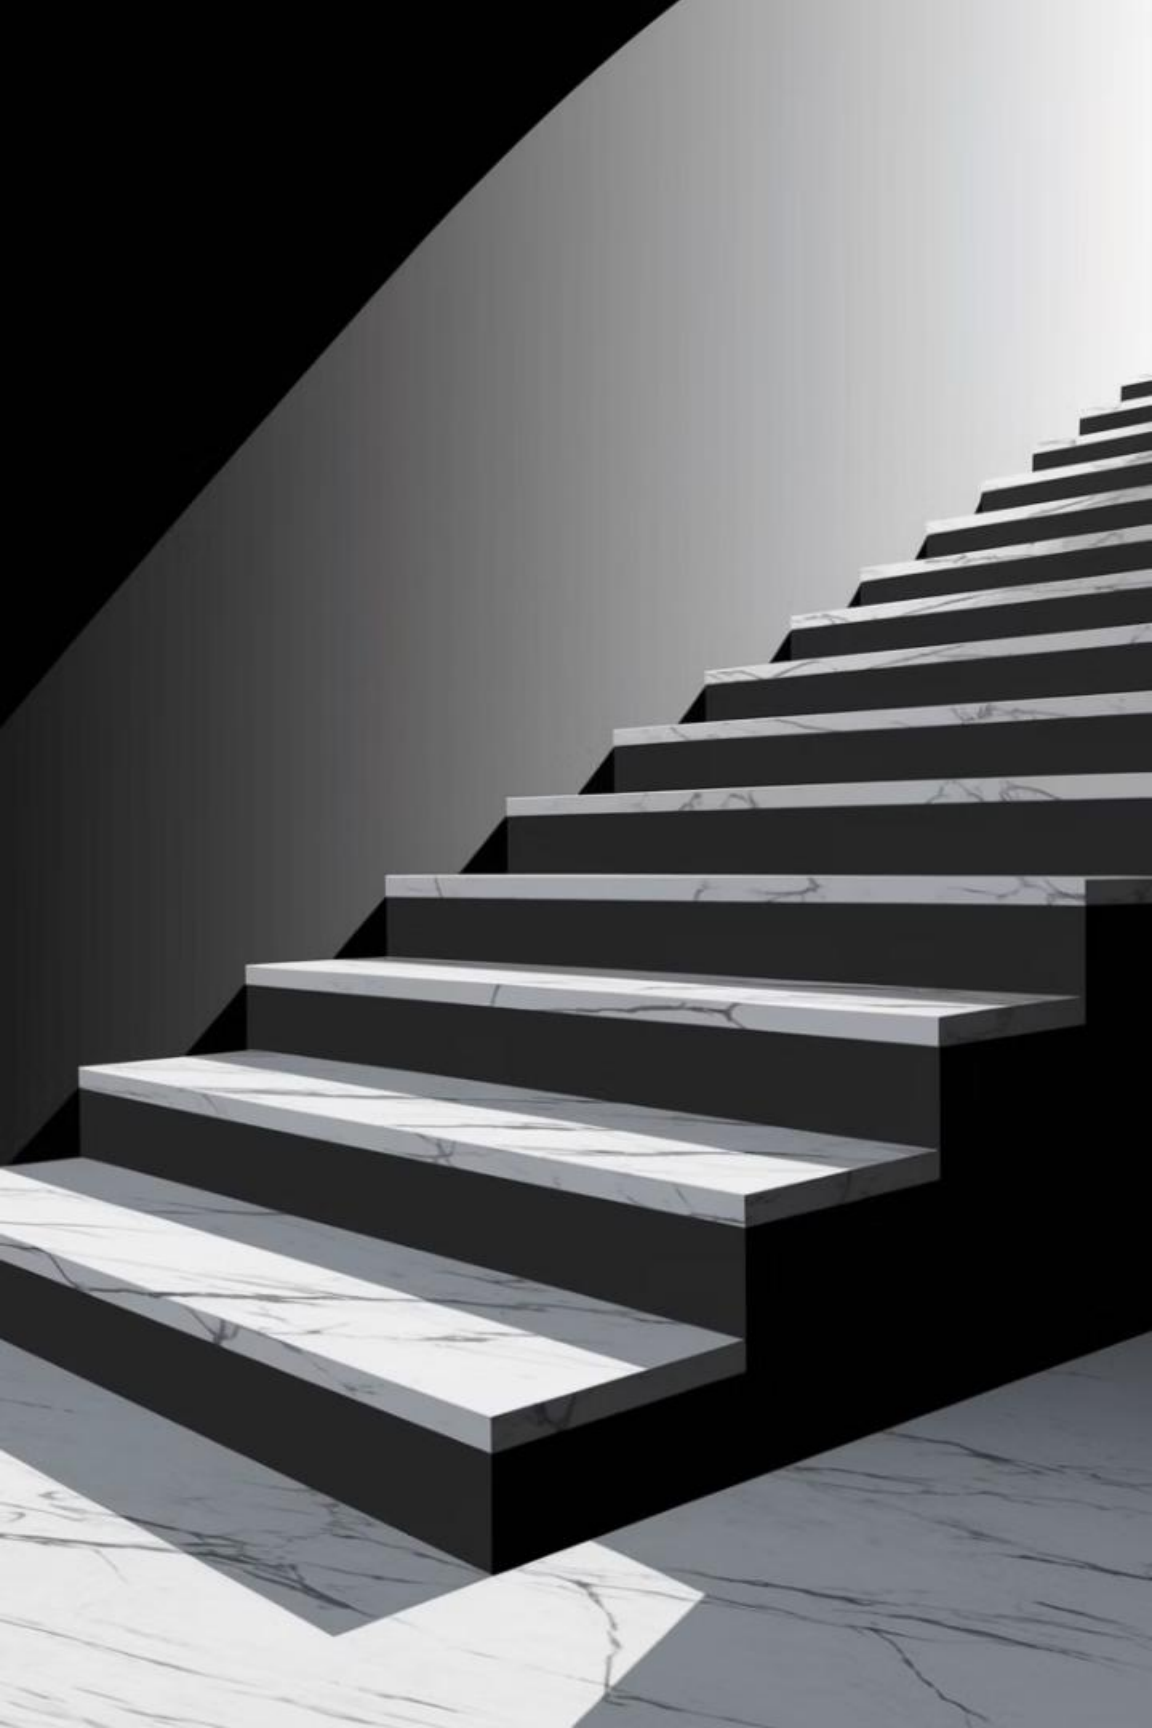

## Understand the Logic

It's like learning to read a map instead of just following turn-by-turn directions. You're looking for anything related to trials, demos, or trying products.

## Look for Similar Words

If you can't find exactly what I described, look for similar words. Maybe instead of "Trials and Demos", it might say "Try and Download". The idea is the same.

By learning this approach, you're setting yourself up for success. You'll be able to find what you need even if the website changes. It's a skill that'll help you whether you're just starting out or planning a big project.

# Key Takeaways and Next Steps

So, there you have it! You now know how to find and stay on top of SAP trials and services. Pretty cool, huh? Remember to check these pages regularly to see what's new.

## Regular Checks

Always check the SAP Discovery Center and SAP website regularly.

## Adapt to Changes

Be flexible and look for similar terms if the website layout changes.

## Hands-On Learning

In our next lesson, we'll dive into how to actually set up and manage your SAP BTP account. Get ready for some hands-on stuff!

Any questions before we wrap up? No? Alright then, see you in the next one!
