

Setting Up SAP Build Apps on SAP BTP Trial Account

 por Mayko Silva

SAP
Build Apps

The logo is centered within a black square, which is itself set against a background of blue lines radiating from the center, creating a starburst or tunnel effect.

Prerequisites: SAP BTP Trial Account

Create a Trial Account

If you don't have a trial account, create one by following the guide on [Getting a Free Account on SAP BTP Trial](#).

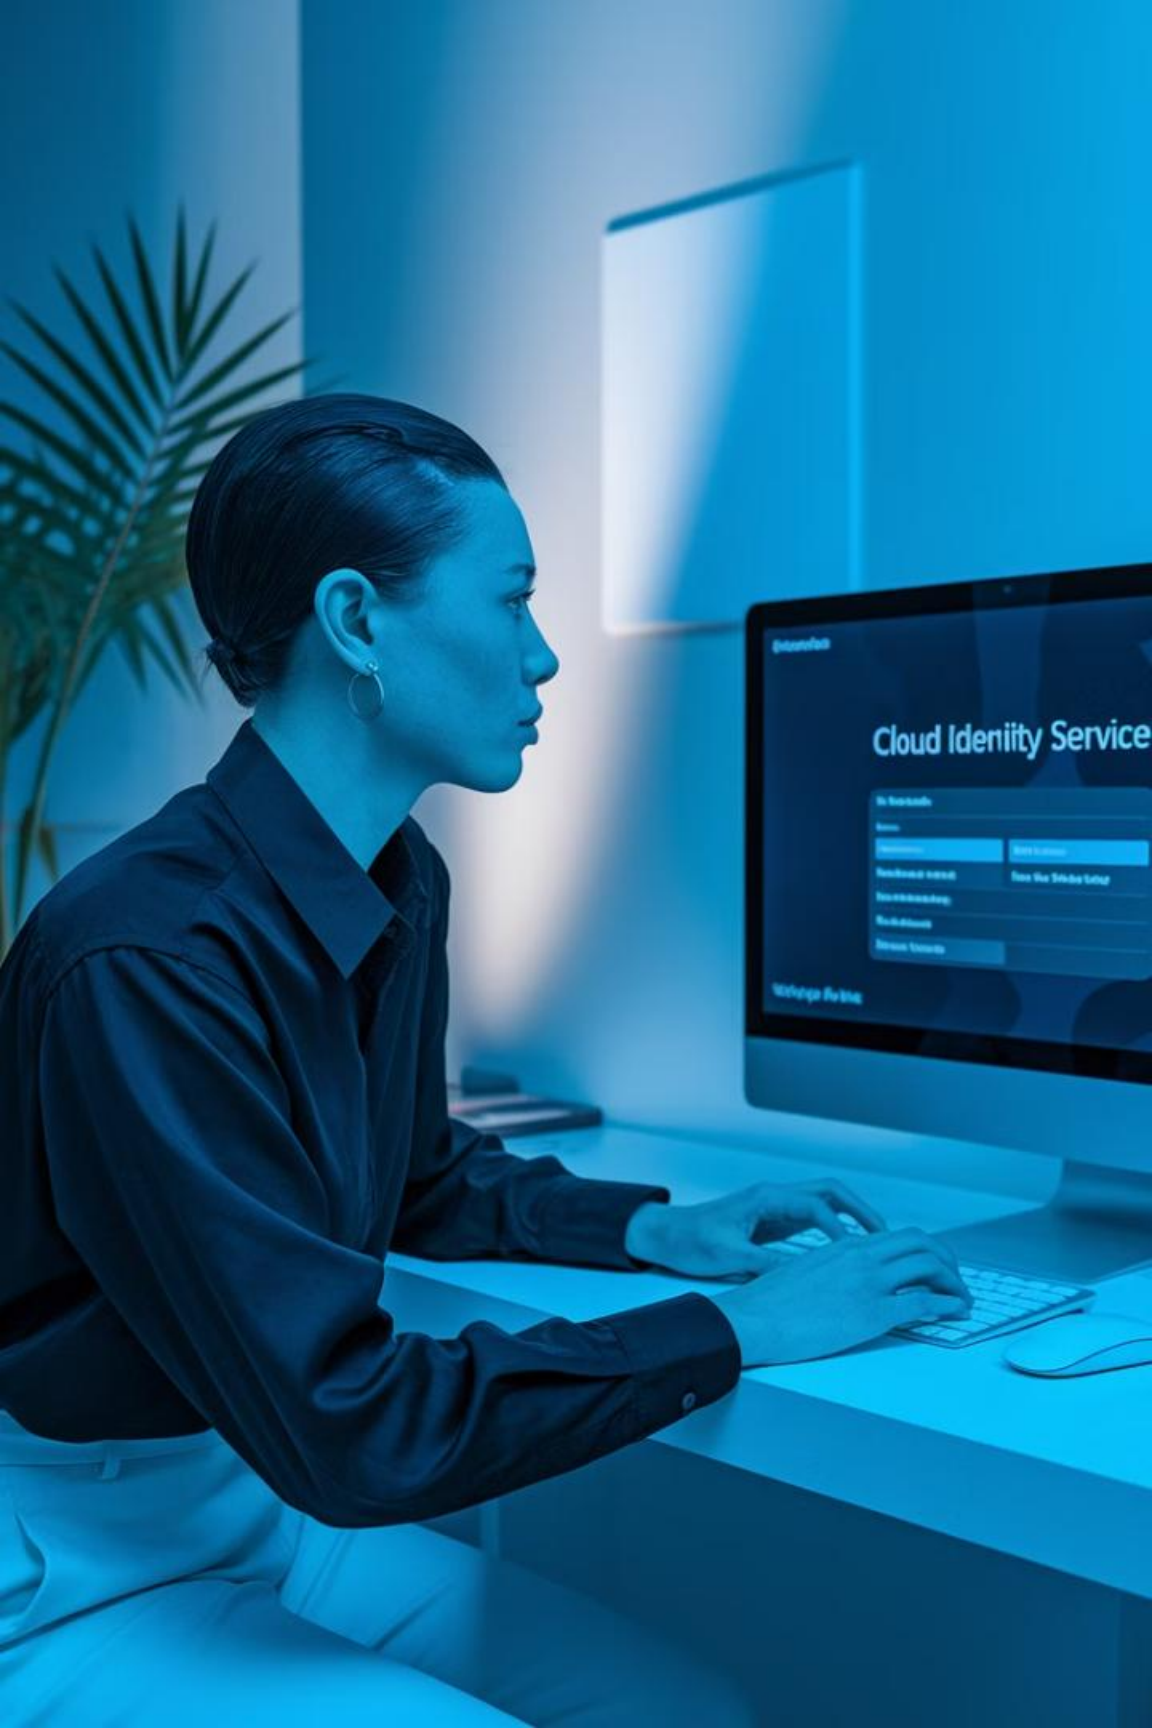

Region Requirements

Ensure your account is in the **US East (VA) - AWS** or **Europe - Frankfurt** region.

Important Note

SAP Build Apps isn't officially supported on the SAP BTP trial landscape yet, so keep this in mind as you proceed.

Step 1: Installing Cloud Identity Service

1

Access Service Marketplace

Navigate to your subaccount cockpit and find the Service Marketplace.

2

Locate Cloud Identity Service

Search for and select the Cloud Identity Service.

3

Create Service

Click "Create" and select the default service plan.

4

Activate Account

Check your email for activation instructions and set up your new account password.

Step 2: Establishing Trust

1

Navigate to Trust Configuration

Return to your subaccount and go to Security > Trust Configuration.

2

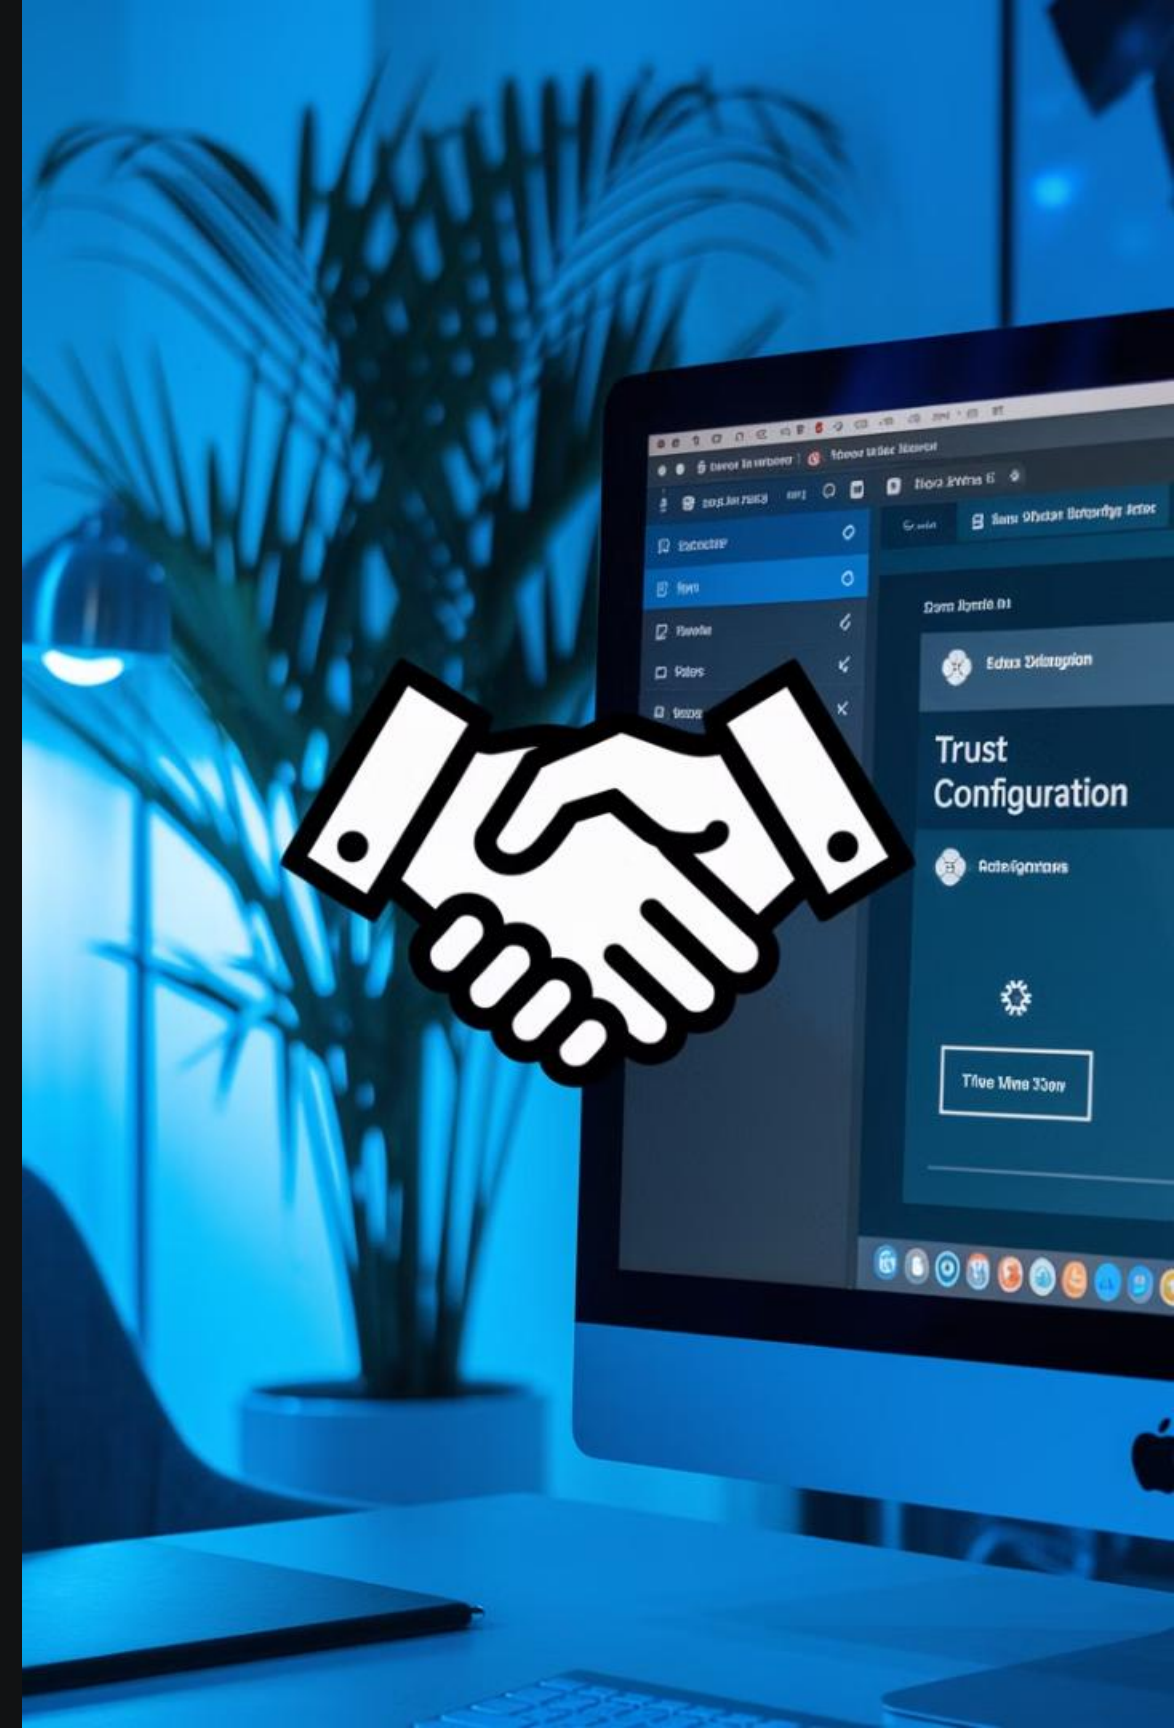

Establish Trust

Click "Establish Trust" and select your newly created identity provider.

3

Complete Setup

Follow the steps, keeping the default settings, and click through to finish.

Step 3: Installing SAP Build Apps

Access Instances and Subscriptions

In your subaccount, navigate to "Instances and Subscriptions".

Create SAP Build Apps Instance

Click "Create" and select "SAP Build Apps" with the free plan.

Complete Installation

Click "Create" again. After a few moments, SAP Build Apps will be added to your subaccount.
