

# HOW TO INSTALL AND CONNECT SAP BTP CLI (Windows)

por Mayko Silva

# Setting Up BTP CLI on Windows

## Download SAP BTP Tools

Visit [tools.hana.ondemand.com](https://tools.hana.ondemand.com) and navigate to the Cloud section.  
Download the Windows version of SAP BTP tools.

## Extract the Package

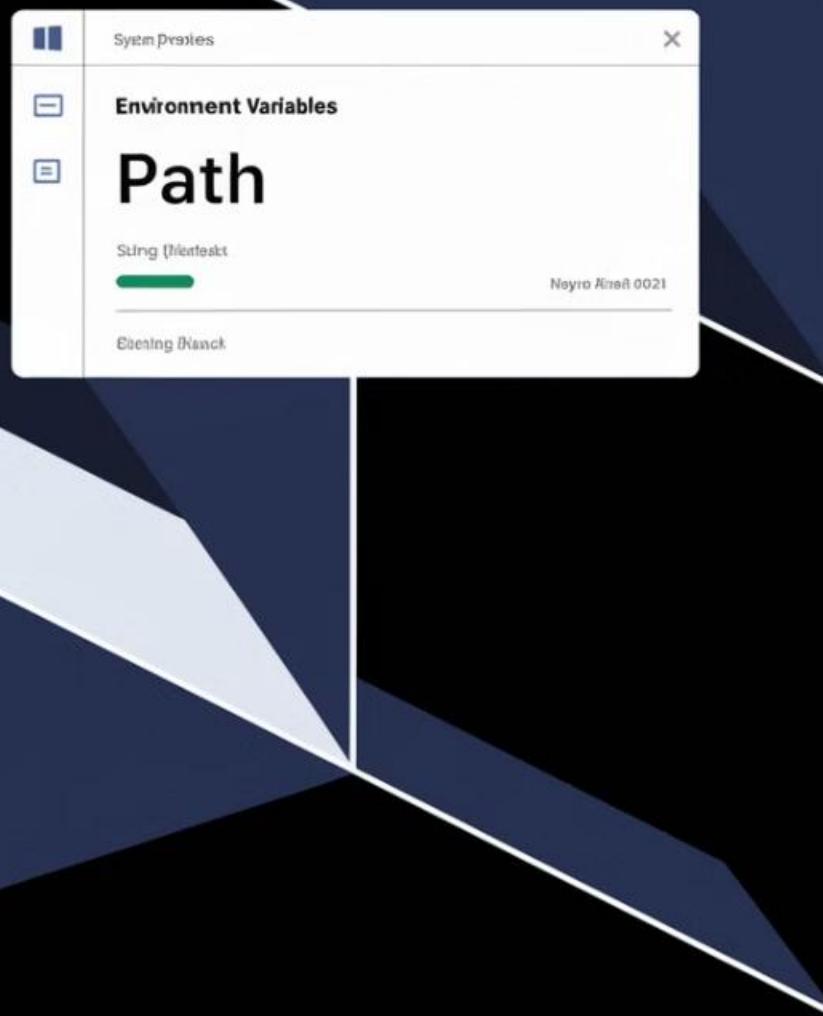

Use 7-Zip or your preferred tool to extract the downloaded package. You'll need to extract twice - first the initial package, then the resulting TAR file.

## Organize Your Files

Create a dedicated folder for the BTP tool, such as "SAP-BTP" on your C drive, and move the extracted files there.

# Adding BTP CLI to Windows Path

- 1
- 2
- 3
- 4

## Access System Properties

Right-click on the Start button and select System. Then click on Advanced System Settings.

## Open Environment Variables

In the System Properties window, click the Environment Variables button.

## Edit Path Variable

Under System Variables, find and select Path, then click Edit. Add the path where you saved your BTP tool.

## Save Changes

Click OK on all windows to save your changes and apply the new Path setting.

# Testing the BTP CLI Installation

## Open Command Prompt

Launch a new command prompt window to ensure it recognizes the updated Path.

## Run BTP Command

Type "BTP" and press Enter. If you see explanatory text about using BTP, congratulations! You've successfully installed the SAP BTP CLI.

## Explore Help Features

Remember, you can always type "BTP help" or add "--help" to any command for assistance.

# Logging In to Your SAP BTP Account

1

## Initiate Login

In the command prompt, type "btp login --sso" to start the login process.

2

## Browser Authentication

A browser window will open. Log in with your SAP credentials to authenticate.

3

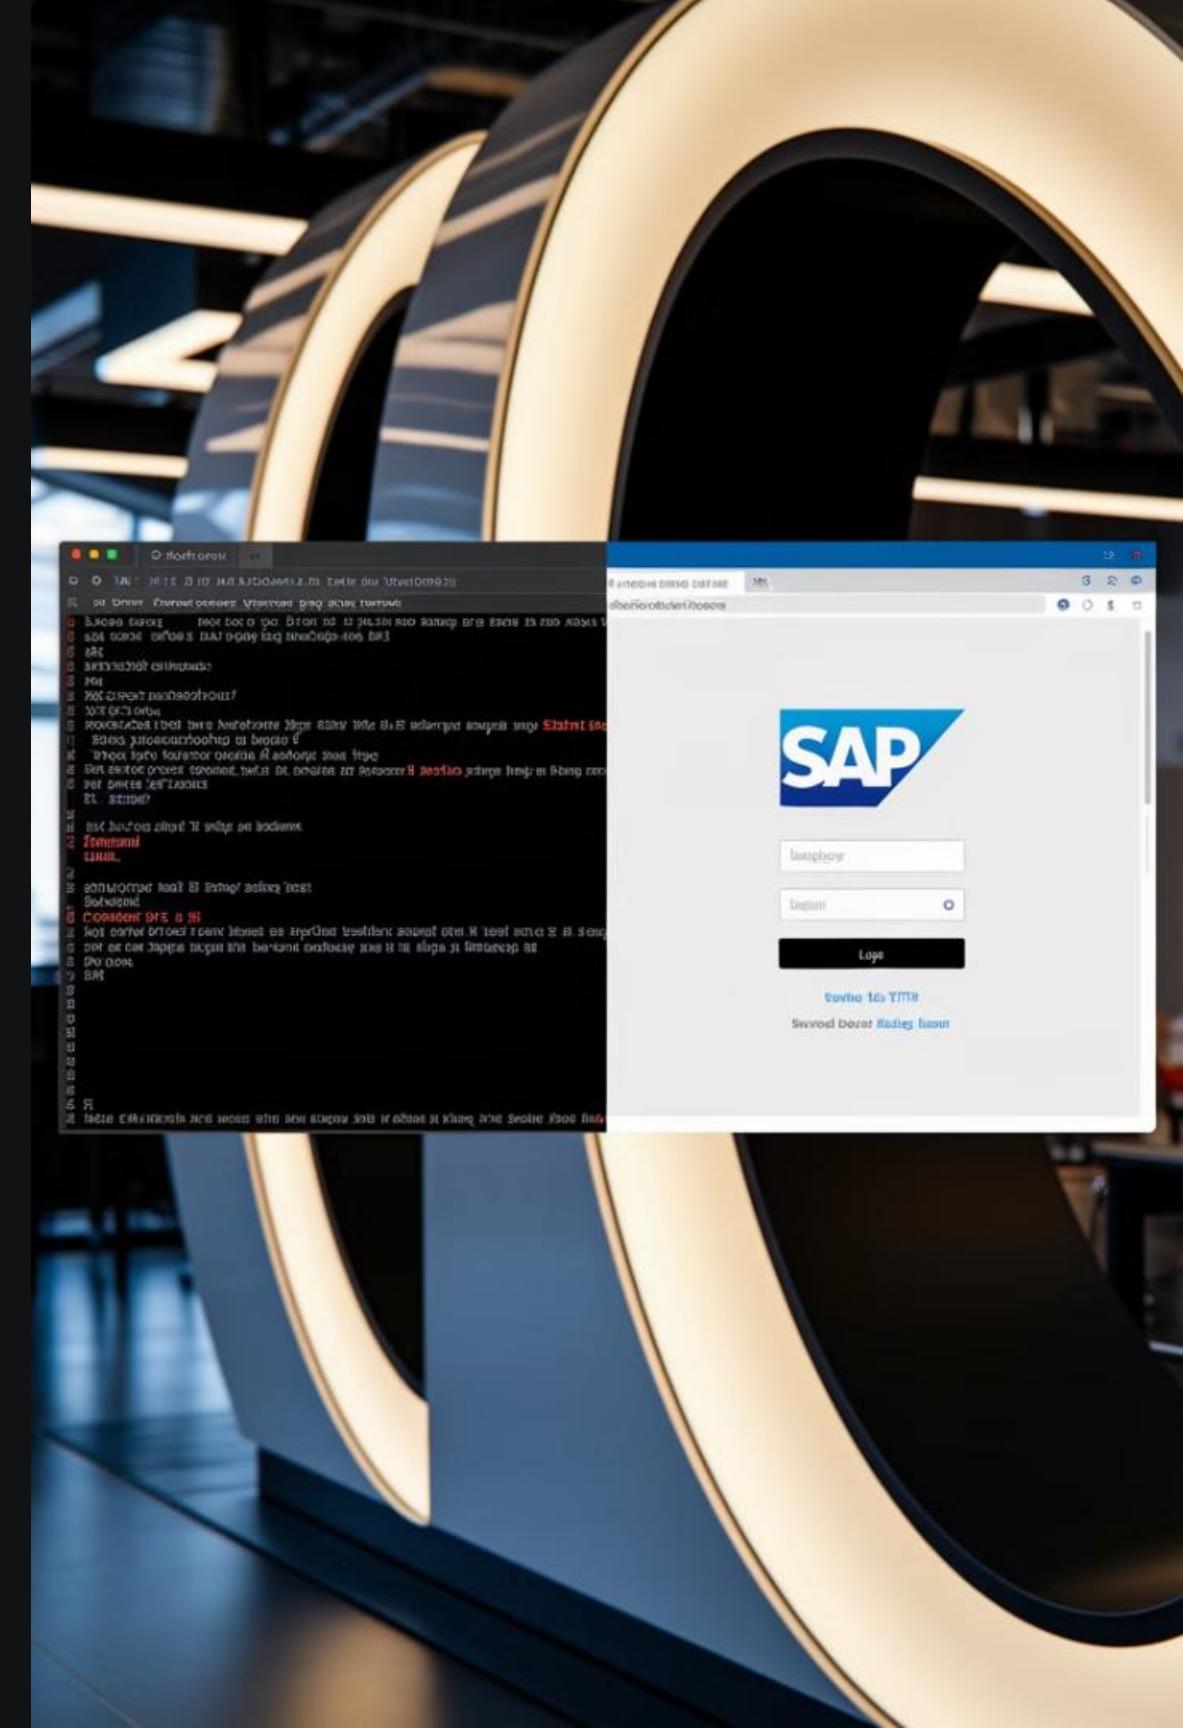

## Confirm Connection

Once logged in, you'll be connected to your SAP BTP account via the CLI.

4

## Test a Command

Try a simple command like "btp list accounts/subaccounts" to verify your connection.

# Embracing Your New CLI Powers

## Explore Commands

Familiarize yourself with various BTP CLI commands to manage your environment efficiently.

## Continuous Learning

Keep exploring new features and updates to stay at the forefront of SAP BTP management.

## Automate Tasks

Use the CLI to automate repetitive tasks and streamline your workflow.

## Enhance Productivity

Leverage your new skills to boost productivity and manage your SAP BTP environment like a pro.

Congratulations! You've successfully installed and run the SAP BTP CLI on your Windows machine. You now have the power to manage your entire SAP BTP environment from the command prompt. Remember, with great power comes great responsibility - so go forth, experiment, and conquer your SAP BTP environment like the command line wizard you've become!
