Application Development in SAP BTP

por Mayko Silva

The Importance of Application Development

Magical Workshop

Application Development is like having a magical workshop in your treehouse, where cool gadgets and gizmos come to life.

Business Analogy

Imagine running a lemonade stand. Initially, everything is done manually, which is slow and inefficient.

Magic of Apps

Application Development in SAP BTP is like waving a magic wand to create apps that automate and streamline business processes.

Key Areas of Application Development

Digital Experience

1

Focuses on creating visually appealing and user-friendly apps using tools like SAP Build Work Zone and SAP Mobile Start. It's like designing a cool sign and comfy chairs for your lemonade stand.

Development Efficiency

2

Utilizes "fusion development", allowing both citizen developers and professional developers to work together seamlessly. It's like building with Lego blocks and clay simultaneously.

SAP Build

3

The secret sauce of Application Development in SAP BTP, offering tools like SAP Build Apps, SAP Build Code, and SAP Build Work Zone for easy app creation and personalized user spaces.

Collaboration and Extensibility

Seamless Integration

All SAP Build tools work together smoothly, like superheroes combining their powers to become unstoppable. This integration allows for efficient and powerful app development.

Extensibility

SAP BTP supports extensibility, allowing businesses to add new features to existing SAP applications. It's like adding a smoothie maker to your lemonade stand without rebuilding the entire structure.

Business Impact of Application Development

Customized Solutions

Businesses can create exactly the apps they need, tailored to their specific requirements and challenges.

Rapid Adaptation

Companies can adapt quickly to new challenges and opportunities in the ever-changing business landscape.

Enhanced Experiences

Application Development in SAP BTP enables businesses to provide better experiences for both their customers and employees.

The Big Picture

Bringing Ideas to Life

Application Development is about transforming innovative ideas into functional, user-friendly apps.

1
